

SignSnapp Privacy Policy

Effective Date: October 2025

At Sommet Industries LLC (“we”, “us”, or “our”), we respect your privacy. This Privacy Policy explains how SignSnapp (“the App”) collects, uses, and protects your information.

1. Information We Collect

SignSnapp is a locally installed desktop application. We do not collect, store, or transmit any personal data, signatures, or documents to external servers. All files and data remain on your local device.

2. Payment Processing

Payments for SignSnapp are handled securely by Stripe. When you make a purchase, Stripe collects certain information (such as name, email, and payment details) to process the transaction. We do not have access to or store your payment information. You can read Stripe’s privacy policy at <https://stripe.com/privacy>.

3. No Tracking or Analytics

SignSnapp does not include analytics, tracking tools, cookies, or telemetry. Your usage of the application is entirely private.

4. Data Security

Because your files and data remain on your local machine, you maintain full control over your security. We recommend safeguarding your device with encryption and strong passwords to prevent unauthorized access.

5. Updates

From time to time, we may release updates to improve performance or add features. Updates may be downloaded from our official website (<https://signsn.app>). No automatic background data collection occurs during updates.

6. Contact

If you have any questions about this Privacy Policy or your data, please contact us at: jasommet@gmail.com

7. Changes to This Policy

We may occasionally update this Privacy Policy. The latest version will always be available at <https://signsn.app/privacy-policy>.

By using SignSnapp, you agree to this Privacy Policy.
